SUMMARY

Full Stack Developer with a Bachelor's degree in Computer Science and about six years of experience building production web applications — from WordPress and Shopify sites to PHP/Laravel business systems — mostly on Japan-facing teams as part of a Myanmar-based offshore group. Comfortable across the stack, from React and JavaScript on the frontend to Laravel/PHP and MySQL on the backend. Holds JLPT N3 and is looking for a full-stack role, ideally at a Japanese company.

TECHNICAL SKILLS

Frontend	React, JavaScript, TypeScript, HTML5, CSS3/SCSS, jQuery, AJAX, Bootstrap, Tailwind CSS, Vue.js, Next.js	Backend	PHP, Laravel, WordPress, Shopify/Liquid, Ruby, Java/Spring Boot, REST APIs
Database	MySQL, PostgreSQL, Supabase	Tools	Git, Sourcetree, Fork, Docker, VS Code, Postman, Backlog, Linux (Ubuntu)

PROFESSIONAL EXPERIENCE

Global Innovation Consulting Inc. Apr 2025 – Present
Full Stack Developer

- Maintain and support a shipping management system for a Japan-facing client, covering detailed design, testing, and direct customer support.
- Built an insurance application platform end to end — data registration, document generation, and admin approval workflow — across React and Laravel/Spring Boot.
- Developed a web app automating monthly PMO reporting: Excel-to-PowerPoint generation with SharePoint upload via Microsoft sign-in.
- Working across the full lifecycle — strategy, requirements, design, development, and testing — on a multi-tenant applicant management platform.

Brycen Myanmar Co., Ltd. Aug 2024 – Mar 2025
Senior System Engineer

- Developed an e-commerce management platform integrating customer, order, warehouse, and inventory management for a Japan-facing offshore project.
- Conducted source code reviews and managed version control across a 12-person development team.
- Created unit test cases, executed unit/performance/integration testing, and produced QA evidence documentation.

METATEAM Myanmar Co., Ltd. (formerly Seattle Consulting Myanmar) Mar 2019 – Jul 2024
Junior / Senior Developer

- Built and maintained ~20 client websites and web apps — static sites, WordPress, and Shopify stores — for Japanese clients as part of a Myanmar offshore team.
- Developed a multi-vendor e-commerce management system and an internal project/work-hour estimation system.
- Performed unit, integration, and comprehensive testing across projects, including test case creation and QA evidence documentation.

PROJECT HISTORY

#	PERIOD	PROJECT	TEAM	KEY TECHNOLOGIES
1	Mar 2026 — Present	Global AMS A multi-tenant applicant management system used by multiple companies to manage job applicants, from application intake through the interview process — an updated version of an earlier internal system.	6 people	React, PHP, Laravel, JavaScript, MySQL, Docker
2	Aug 2025 — Dec 2025	Monthly PMO Report Creation Project A web app where users sign in with a Microsoft account, upload a monthly PMO Excel report, and the system auto-generates a PowerPoint report and saves it to SharePoint.	5 people	Ruby, TypeScript, React.js, Next.js
3	May 2025 — Jun 2025	Insurance Application Platform An insurance application management platform for individual users and insurance agencies to submit and manage insurance applications.	5 people	React, PHP, Laravel, Java / Spring Boot, MySQL, Tailwind CSS
4	Apr 2025 — Present	Surf Beverage Shipping Management System A shipping management system that streamlines shipment processing based on order data — from order intake through shipment creation, confirmation, and export.	3 people	PHP, Laravel, MySQL, jQuery, AJAX, Git
5	Aug 2024 — Mar 2025	EC Management System A platform integrating customer management, order processing, warehouse operations, and inventory management to improve operational efficiency for a Japan-facing client.	12 people	PHP, Laravel, MySQL, Docker, Amazon S3, Nginx, Git
6	Mar 2024 — Jul 2024	Estimate Management System An internal tool for estimating project time and work hours to streamline in-office project management.	7 people	PHP, Laravel, MySQL, Bootstrap, jQuery, Docker

#	PERIOD	PROJECT	TEAM	KEY TECHNOLOGIES
7	Jun 2023 — Feb 2024	Multi-vendor EC System An internal system centrally managing user accounts, product listings, purchasing/receiving, orders, and coupons for e-commerce operations.	5 people	PHP, Laravel, Vue.js, MySQL, jQuery
8	Jan 2022 — May 2023	FiveVai — Shopify E-Commerce Platform A set of around five e-commerce stores built on Shopify for a Japanese client, developed and operated as part of a Myanmar-based offshore team.	5 people	Shopify, Liquid, HTML, CSS, JavaScript, jQuery
9	Jan 2020 — Dec 2021	Bties — WordPress Sites Around 15 WordPress websites — corporate sites and online stores — built with custom post types, taxonomies, and plugins for flexible content management.	6 people	WordPress, PHP, HTML, CSS, JavaScript, jQuery, MySQL
10	Jun 2019 — Dec 2019	Bties — LP Website Around eight static websites — including shopping and advertising sites — designed to let users intuitively understand valuable content.	5 people	HTML, CSS, JavaScript, jQuery
